

**SALVE REGINA UNIVERSITY  
STUDENT TEACHER HEALTH FORM**

*NOTE: This form must be completed by physician and returned to Education Department office before candidate will be allowed to student teach.*

Dear Physician:

The person named below is planning to student teach and is required to comply with the attached Rhode Island “Rules and Regulations for School Health Programs.”

Thank you for your help in assisting this student to comply with these requirements.

Salve Regina University Teacher Education Programs

**Health Information Required**

110.6.1. Measles, Mumps and Rubella:

Any person born prior to 1956 shall be considered immune.

Persons born after 1956:

\_\_\_\_\_ has evidence of natural immunity as a result of serologic testing, or documentation of physicians diagnosed measles, mumps and rubella:

Date: \_\_\_\_\_ Status: \_\_\_\_\_  
(Documentation)

or

\_\_\_\_\_ has evidence of having been immunized against measles, mumps and rubella with a live virus vaccine on or after 12 months of age. (Persons vaccinated prior to 1968 must be revaccinated);

Date: \_\_\_\_\_ Documentation: \_\_\_\_\_

Vaccination is preferred in lieu of serologic testing for immunity for women who are not pregnant.

110.6.2      Tuberculosis

\_\_\_\_\_ has been examined by me and found her/him free of Tuberculosis based on a physical examination and a negative (<10mm induration) Mantoux (PPD) tuberculin skin test performed not more than six (6) months before the report is filed.

If the Mantoux test is positive (>10 mm induration) or a previous Mantoux test is known to have been positive, the physician's certification that the tuberculosis is not communicable shall be based on documentation of a chest x-ray taken not more than six (6) months prior to the certification.

TEST: \_\_\_\_\_ DATE: \_\_\_\_\_

\_\_\_\_\_ DATE: \_\_\_\_\_

China, Hong Kong SAR	Haiti	Mauritius	Rwanda	Zimbabwe
China, Macao SAR	Honduras	Micronesia	Sao Tome & Principe	

\* World Health Organization, Global tuberculosis control. WHO report 2002.

If the answer to any of the above is **YES**, the Massachusetts Department of Public Health **strongly recommends** that you have a tuberculin skin test to check for latent tuberculosis infection. If the answer to all of the above questions is **NO**, a tuberculin skin test should not be done. Please note: If you have had a positive tuberculin test in the past, you do not need another test.
